

Zoltan Almodo

JavaScript, React, Node.js web developer based in London, UK

07501 927 004

zoltanalmodo@gmail.com

Profile

I enjoy solving problems, enthusiastic about programming and learning new technologies.

Happy to work with others and share different views in development with a strong attitude towards finding the best solutions.

My Education and experience in Product Design, Design Management and Visual Communications allow me to work closely with designers and design assets, to understand and modify UX, branding and communication strategies, and to comprehend and advise on business requirements.

I work cooperatively maintaining clear and constant communication with others. I am organized, responsible and open to new ideas, respectfully considering the viewpoints of other people through active listening. I am able to coordinate tasks based on priority while focusing on the end result.

Projects

OneDeko Ltd. London: website / web-shop design, maintenance and social promotions:

<https://twitter.com/onedeko?lang=en>
